

EYE PROTECTION

LAB ACTIVITIES

1.

Ask students to find the stamp “Z87” on their safety glasses.

If anyone is wearing prescription safety glasses, they should find “Z87” on the temple and the marking on the lens. Be sure that the side shields are present and installed correctly.

2.

Verify that all students that safety glasses that wrap-around their eyes. For models that do not have permanently attached side shields, verify that they are installed correctly.

3.

Remind students when to use eye protection. Refer to the posted PPE Table that accompanies the Shop Safety Rules.
