

HEARING PROTECTION

HOMEWORK

1.

Use this on-line demonstration to have an idea about how well a person with noise-induced hearing loss can hear:

<http://www.hse.gov.uk/noise/demonstration.htm>

2.

Read what your favorite artists have to say about tinnitus:

http://hearinghealthfoundation.org/artists_talk_tinnitus

3.

Read this factsheet to learn more about the noise levels of many tools you use, and how can you find out how loud your tools are:

- **Factsheet – Tool Noise Levels in Collision Shops.pdf** available in “I want to know more” folder.
