

RESPIRATORS – PART 1

AIR-PURIFYING RESPIRATORS

LAB ACTIVITIES

1.

Demonstrate and ask students to perform user seal check for half face respirators.

2.

If you have A PAPR unit in your shop:

- Demonstrate the use of PAPR (connecting battery, hoses, putting on the head gear).
- Explain and demonstrate how to verify airflow delivered to the user.
- Show students the location of the battery charging station. Explain what indicates that batteries are ready to use.
- Explain the procedures for storage, cleaning, and maintenance of the PAPR.

3.

If you don't have a PAPR in the shop:

Show students this video that covers airflow check: <https://www.youtube.com/watch?v=pSiiw-wascE>
